

Professional Summary

Java Full Stack Developer fresher with hands-on experience in building web applications using React.js and Spring Boot basics. Completed an internship and personal projects involving frontend development, REST API integration, and MySQL database design. Comfortable working with Core Java, OOP concepts, and Data Structures, with a strong interest in full stack development.

Technical Skills

Programming Languages: Java (Core Java, OOP, Collections), JavaScript, C
Frontend: React.js, HTML, CSS
Backend: Spring Boot (Basics), REST APIs, CRUD Operations
Databases: MySQL (CRUD Operations, SQL Queries, Joins, Schema Design, ERD Design)
Testing: Manual Testing, Functional Testing, Regression Testing, Integration Testing, Bug Reporting, SQL Validation
Tools & Platforms: Git, GitHub, Firebase, Vercel, Eclipse, Postman
Core Concepts: OOP, API Integration, Asynchronous Programming

Experience

Web Developer Intern | Tech VaseegrahSep 2025 – Dec 2025

- Worked on the frontend of a messaging web application that connects with the WhatsApp Business API.
- Built React.js components for chat screens and basic user interface elements as part of the team.
- Consumed REST APIs provided by the backend team to display and update messaging data on the UI.
- Used React Hooks (useState and useEffect) to fetch and display data dynamically on the user interface.
- Worked with API responses from Shopify and WooCommerce to display order information on the frontend.
- Developed reusable React components such as buttons, forms, and cards to improve code organization.
- Resolved UI bugs and improved page responsiveness across different screen sizes.

Projects

Career Path MakerReact.js | Spring Boot | SQL | Firebase

- Built a full-stack web application that helps students choose a career path and follow a step-by-step learning roadmap.
- Created the frontend using React.js with separate components for roadmap view, profile, and progress tracker.
- Built basic REST APIs in Spring Boot to save and fetch user roadmap and progress data from the database.
- Added Firebase Authentication to enable secure user sign-up and login.
- Broke each career roadmap into smaller milestones so users can track completed topics and overall progress.
- Added a streak counter that updates when users complete tasks to encourage continuous learning.
- Integrated the YouTube API to fetch and display tutorial videos for each roadmap topic.
- Integrated the Gemini API to provide career-related suggestions based on user input.
- Designed a SQL schema with tables for users, roadmaps, and progress tracking, and tested the complete application flow.

NeuroArtify – AI-Based Image Transformation PlatformReact.js | Flask | Firebase

- Built a web application that allows users to upload images and apply AI-based transformations such as background removal, style transfer, and enhancement.
- Created the React.js frontend for image upload, preview, and displaying transformed output.
- Designed the user interface to display uploaded and processed images for easy comparison.
- Developed Flask REST APIs to connect the frontend with AI image processing services.
- Added Firebase Authentication so only authenticated users can upload and process images.
- Implemented basic frontend error handling for failed API requests.
- Tested image upload, processing, and download functionality using different image formats.
- Co-authored and published a research paper describing the system architecture and implementation.

Achievements

- Published research paper titled “NeuroArtify: AI-Based Image Transformation Platform” in IJIRT (2025).
- Demonstrated strong analytical, debugging, and validation skills through AI and full-stack application development.

Education

Bachelor of Technology (Computer Science Engineering)2022 – 2026

Dhanalakshmi Srinivasan UniversityCGPA: 7.56/10

Intermediate (Class XII)2020 – 2022

Prathibha junior college74%

Secondary School Certificate (Class X)2019 – 2020

Vignan High School98%

Certifications

- Developing Frontend Applications with React – Coursera (2024)
- Full Stack Development with IBM – Coursera (2025)
